

## Did You Know?

Statistics show that a new threat occurs every hour of every day.

While 83% of consumers have a desktop security solution, 65% are not using a virus software, fail to update virus definitions, or have expired virus software on their computers.

It takes less than 60 seconds for an unprotected PC to be infected.

*While no Internet security solution is 100% effective in stopping every type of attack, SecureIT Live & SecureIT Plus go a step further to provide:*

Automatic updates. *SecureIT Live and SecureIT Plus* run lean on your machine keeping you updated without any user hassle. When you do want to check on your *SecureIT* status, the friendly management console is a click away.

24/7 Tech Support. Our computer specialists are available 7 days a week, 24 hours a day. We realize that computer problems don't wait until normal business hours and we're here to help at any time.

*Security Coverage 24/7 Tech Support*  
**1-877-373-3320**

## Getting Started. . .

- ◆ We will activate the *SecureIT* program and generate an email message to your valleytel.net email address. This email contains a "**registration key**" which you will need in order to proceed with the remote installation.
- ◆ Open the email, using the computer that you want *SecureIT* to be loaded onto. The email contains a secure link to download the *SecureIT* software.
- ◆ Please contact Security Coverage at **1-877-373-3320** for assistance in setting up your new *SecureIT* services. In order to provide the product guarantee, your installation **MUST** be completed by Security Coverage. (*Product Guarantee\* includes FREE removal of viruses if your computer becomes infected. This guarantee is only in effect if Security Coverage installs your service.*) One time fee of \$14.95 per computer.
- ◆ The *SecureIT* technician will do a quick scan of your computer. If your computer is found to have existing virus/malware/spyware, the technician will advise you of his/her findings and the computer will need to be properly cleaned before the installation process can continue.
- ◆ Removing virus/spyware/malware can be costly, but Valley Internet has made an agreement with *SecureIT* and their certified technicians (TotalTech) to clean your machine for a discounted, one-time fee of \$89.95.
- ◆ Once any necessary cleanup and full installation is complete, your computer is ready and protected for optimal performance. There is no need to do virus definition updates! Your new *SecureIT* service will update definitions automatically.

\*Product Guarantee

If your computer suffers an Internet-related issue while using *SecureIT Live* or *SecureIT Plus* and it meets all the criteria, we will remove the threat or pay up to \$100 to have your computer repaired. To qualify for the guarantee, the following criteria must be met: The computer is running *SecureIT Live* or *SecureIT Plus*. *SecureIT Live* or *SecureIT Plus* must be installed through a Supported Remote Installation or Fresh Start Installation by a *SecureIT* certified technician. The technician must certify that the machine is free of any viruses or other malicious security threats at the time of installation. The threat on the machine must have occurred while *SecureIT Live* or *SecureIT Plus* was installed. A Security Coverage technician must be allowed to fix the computer before engaging an outside computer repair company. Security Coverage, at its sole discretion, will determine when it is appropriate to engage an outside computer repair entity. Maximum amount of the guarantee is \$100 to be paid toward the repair of your computer. Security Coverage reserves the right to deny the guarantee claim if the threat is deemed to be preexisting or self-inflicted.

### What is SecureIT?

*SecureIT Live and SecureIT Plus* offer the right mix of security technology for the best protection available. With *SecureIT* you no longer have to choose from numerous products all labeled with the latest tech buzz words. We've removed the guesswork by ensuring *SecureIT* has everything you need to stay protected online. *SecureIT* is your comprehensive Internet protection solution.

*SecureIT* products simplify the technology experience for computer users by providing expert support and unmatched customer service.

### Why SecureIT?

Plain and simple, *SecureIT* is built for computer users that need the ultimate in online security protection but don't want to become security or technology experts. The *SecureIT* Security products offer the latest in comprehensive technology and ease of use with 24x7 technical support provided by the Security Coverage team located in Cedar Rapids, IA.

### Do I have to leave my computer on all of the time?

No, if you happen to have your computer off at the time the program runs its various scanning processes and updates, they will automatically run the next time you turn your computer on.

### How do I know that I am being protected?

Double click and open the *SecureIT* console in your task tray. Click the Status tab to verify that all components of the software are up to date.

## SecureIT Features

- **Anti-virus/Anti-spyware Protection**  
Real time protection against viruses, worms and trojans as well as protecting your privacy.
- **Pop-Up Blocker**  
Stop annoying pop-up ads invading your PC.
